Run summary

Device: mps

Held-out images: 168

Decision threshold: 0.50

Robot mode: simulated

Test F1

0.899

Test AUROC

0.958

Reset demo

Factory Floor Debris Inspection

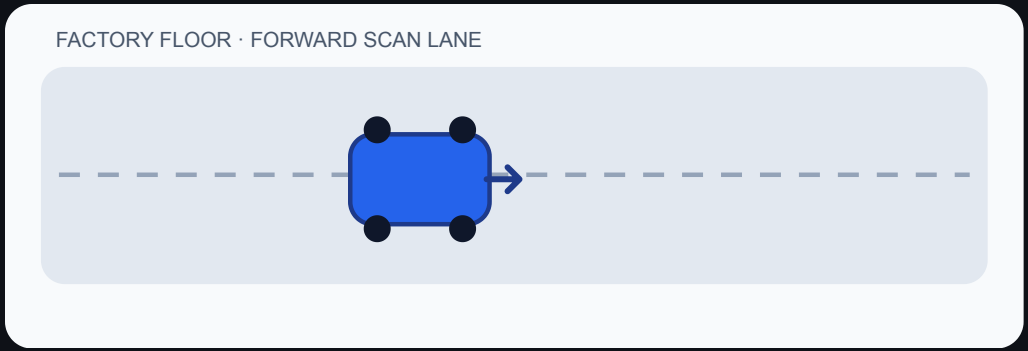

ResNet-50 image classifier connected to a simulated wheeled robot. This demo sends no commands to physical hardware.

Clear and resume

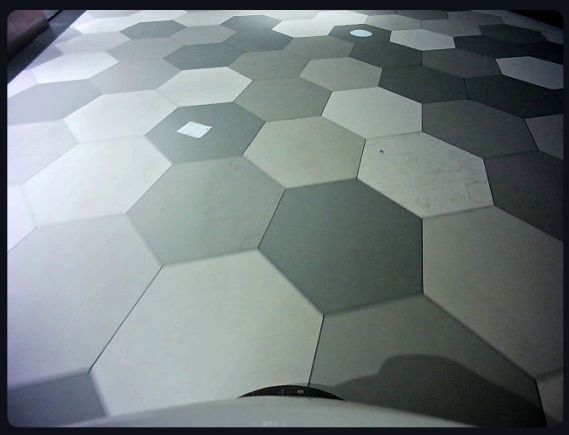

Robot state: PAUSED - DEBRIS

Action policy: **scan → log debris and pause, or move forward.**

Simulated robot

Camera image

Current scan · robot paused for operator review

Latest model result

Prediction

Solid Debris

Debris probability

99.8%

Confidence in predicted class

99.8%

Debris predicted — robot stopped and logged the image.
